

Safe and Proper Use of Aquatic I.D. Neck Bands

These bands are designed for safe, easy-on / easy-off use, and should be put on and taken off properly.

Do Not Unfasten the Safety Breakaway Buckles!

Each Aquatic I.D. Neck Band is designed to be easily put on by holding the Safety Breakaway Buckle securely in one hand and stretching the elastic cord with the other.

When you have the band stretched out, just slip the Aquatic I.D. Neck Band over the head and ears of the swimmer, and then relax the stretch slowly (to avoid snapping the band and causing any injury).

When removing the Aquatic I.D. Neck Band do the same thing; hold the Safety Breakaway Buckle securely in one hand and stretch the elastic cord with the other hand.

When stretched out, carefully slip the Aquatic I.D. Neck Band over the ears and off the head.

Safety Breakaway Buckle - Do Not Disconnect

The buckle is designed to come apart in an emergency to protect the swimmer in and out of the pool.

Do Not Use These Aquatic I.D. Bands in an Unsafe Manner.

1. Do not grab or pull on bands of other swimmers.
2. Do not disconnect the Safety Breakaway Buckle and use the band to snap anything, including other swimmers.
3. Do not trade bands with other swimmers.
4. Use Aquatic I.D. Neck Bands for pool identification only.
